TULIPS & AUTUMN, 1926 NARCISSI

Oronogo Flower Gardens CARTERVILLE, MO.

BENJAMIN C. AUTEN

Terms: Cash with order. No charge for packing. Goods offered subject to previous sale. All prices include delivery by mail or express.

Items quoted only in small quantities can be furnished only in small quantities, and at the printed prices.

Bulbs shipped on receipt of order, plants in regular routine of digging and shipping. Bulbs and plants not shipped together, nor at the same time.

No guarantee goes with my bulbs or plants, but I take extreme pains to have them true to name, and it is on them I depend for future orders. Write me, however, if you fail to have success with them. It is important for me to know.

If a mistake is made in the filling of your order or the package reaches you in bad condition, write me. I do not know of it unless you do.

If you do not hear from your orders in a reasonable length of time, write. Orders may get lost on the way, may possibly be overlooked after receipt, or the shipment may go astray.

Order early and plant early, while the bulbs are still fresh and solid.

Next year's price list will as a matter of course be sent to all this year's customers, but I do not keep a permanent mailing list.

As my customers mostly are familiar with the management of these flowers, I am omitting this year the usual detailed information and planting directions. I have a number of old left-over catalogues, however, which give full information, and shall gladly send a copy to anyone wishing it. A postal-card request will bring one.

Tulip and narcissus bulbs should be planted about three inches deep to the tops of the bulbs as soon as possible after summer heat and drouth are broken, must remain in the ground over winter, and should not be disturbed until the leaves have turned yellow in early summer. This is the correct time to dig them. Narcissi prefer to be left in the ground several years. Tulips are better dug every year, though they may be let go an extra year if small when planted.

Bulbs should not be allowed to lie in the sun when dug, nor when planting, nor at any other time. They should be stored cool, dark, and well ventilated.

NARCISSUS BULBS

My descriptions may seem short, but there is a large amount of description in the key following the name. The Ajax type is the one with the long trumpet; the Incomparabilis has the half-length trumpet or cup, the Barrii the quarter-length cup. The Poeticus type has a white flower with a little flat red-edged saucer in the center. The Poetaz, Tazetta, and Jonquil types are bunch flowered and the blooms have small cups. The Leedsii type has medium or small cups and is primrose-white in color. Y, W, and Bic stand respectively for yellow, white and bi-color (white with yellow trumpet or cup). 1, 2, -6 tells the season of bloom. F means that a variety is good for forcing, FF that it is very good.

My supply of many of these varieties is very small: therefore do not order more of any kind than the largest number offered of that kind.
